

# The Virus Relay

A model to assess the risk of Norovirus, Enterovirus 68, Ebola, Flu and Colds in restaurants, schools and healthcare foodservice.

-  Primary Pathogen Path
-  Secondary Pathogen Path

**Note: Up to 20% of Foodservice Customers are immune compromised.**  
(In Healthcare this number approaches 100%)

\*Foreign travel, risky lifestyle, household or food exposure.  
Based on Barry Michael's Food Worker Study - 2002
